**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 5, 6, 8, 9, 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Franke (WO 97/21867 cited in the IDS dated 12/01/01).

Franke discloses a transfer sheet including a carrier sheet; a one- or multi-colored pattern printed on the carrier sheet using a digitally controlled color printer; a transparent or white-pigmented layer printed configuratively by silk screen printing on the pattern; a layer of heat activatable, thermoplastic polymeric glue layer positioned over at least said white-pigmented layer or the transparent or white-pigmented layer includes an adhesive (see, for example, the paragraph bridging pages 4 and 5 of the specification of the present application describing WO 97/21867).

It should be noted that it is well settled that "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production." In re Thorpe, 227 USPQ 964, 966 (Fed. Cir. 1985).

Art Unit: 2861

Therefore, the processes used to deposit the various layers are not given patentable weight.
